

PEDI-CAT Windows vs. Q-global versions

Windows®	Q-global®
Subscription-based; annual fee regardless of usage	Pay-as-you-go; usages never expire
Restricted to one Windows PC or tablet	Can be used on any internet-enabled device, including smartphones and Apple products
Requires “live” administration	Respondents can be sent a link to complete the assessment remotely in their own time
Data stored on device; difficult to combine data from multiple devices e.g., for research purposes or organizations with multiple sites	Data stored on secure servers; data from multiple users can be extracted and consolidated easily
Subscriptions managed individually	Customizable account structure for large organizations; users have access to pooled inventory rather than purchasing for each user separately
Wide age bands (22 age bands across age range)	Narrower age bands (59 total) for improved accuracy of T-scores
Test must be administered in one attempt	Administration can be paused as needed; data is not lost if connection is interrupted
Available languages: English (US), Spanish (US), French Canadian, English (Commonwealth), Dutch, Italian, and Brazilian Portuguese	Available languages: English (US), Spanish (US), French Canadian, English (Commonwealth), Dutch, Italian, Brazilian Portuguese, German, Swedish, Norwegian, and Danish
