

# Shaywitz DyslexiaScreen™

## Report Information

**Report Date** August 30, 2021

## Test Information

**Test Dates** April 2021  
April 12, 2021  
**Schools** Valwood Elementary,  
Turner High School  
**Grades** K, 9  
**Forms** Form 0, Adolescent-  
Adult Form  
**Students  
Assessed** 15

The Shaywitz DyslexiaScreen™ is a rating scale of language and academic risk factors that indicates whether an individual may be at risk for dyslexia.

Forms 0–3 are teacher surveys for identifying students at risk for dyslexia in kindergarten through Grade 3, respectively. The Adolescent-Adult Form is a self-report survey that identifies individuals ages 14–65 who are at risk for dyslexia.

The results of the Shaywitz DyslexiaScreen alone are not sufficient to diagnose or rule out dyslexia; however, the results provide a reliable and valid indication of risk for dyslexia.

## Overall Screening Results

Number of Students Assessed: 15

**47%** ■ At Risk  
7 students  
**53%** ■ Not At Risk  
8 students

## Summary Results

These results summarize the total number of students assessed and the proportion of students who met the criteria for At Risk for Dyslexia and Not At Risk for Dyslexia.
